Portfolio: [tthompson899.net](http://tthompson899.net)

**SUMMARY:** Full Stack Web Developer who creates websites in Javascript, PHP and SQL. Enthusiastic about all things web development who learns quickly and implements new technologies.

## TECHNICAL SKILLS:

**Languages:** PHP, HTML5, CSS3, Javascript

**Frameworks:** CodeIgniter, Materialize, Bootstrap, Javascript (Angular JS, Express.js)

**Databases:** MySQL, MongoDB, Mongoose.js

## PROJECTS:

**MINI MEAN STORE** - Used MongoDB, Express.js, Angular 1 & Node.js to create an e-commerce web application. Individually, we were tasked with creating an e-commerce application. This project was completed by creating databases in Mongo and coding each page separately starting with the customers and working my way to the dashboard. I ended up with an commerce app where a user can add themselves as a customer, create a new product, create a new order and view the most recent customers, products and orders.

View project: [https://github.com/tthompson899/mini\\_product\\_store](https://github.com/tthompson899/mini_product_store)

**ROCK-PAPER-SCISSORS PROJECT** - HTML, CSS, Javascript & JQuery - In one week, I utilized analytical skills to break each part of this project into smaller sections (timer, score board, etc.). In the end, I was able to create, what I like to think, is a cool game and also challenged myself to hand code without the use of a framework to complete each task to form the finish product.

## WORK HISTORY:

**Web Developer (Lay Off)** Pinnacle Property Management Dallas, Texas July 2017 - Nov. 2017

- Push code to production on a weekly basis using Coldfusion, Javascript and JQuery
- Within two weeks of hire, started contributing and pushing code to production
- With help creating a layout of the page, coded a management/organization tool in 2 months time for the company's corporate intranet
- Create basic CRUD queries using SQL
- Regularly provide updates to the corporate intranet

**Teaching Assistant (Part-Time)** SMU Coding Bootcamp with Trilogy Education Dallas, Texas April 2017 - Oct. 2017

- Ensure the instructor is keeping on track of the lesson plan for the class
- Grade and Review student's code and give feedback
- Code one on one with students and answer any questions they may have

**Instructor (Part-Time)** CodeStream Studios, LLC Dallas, Texas February 2017 - July 2017

- Taught about 15 3rd graders to code Monday - Thursday for an hour
- Taught up to 4 high schoolers to code (ages varied) in HTML and CSS
- Worked alongside coworker through CodeSlams - 2 hr long coding sessions with middle schoolers
- Completed reports daily after class and planned for class each day
- Assist and monitor milestone projects, curriculum delivery, daily coding assignments, lesson plan tracking and provide support and additional training (as needed).

**Business Systems Analyst I** Southwest Diagnostic Imaging Center Dallas, Texas October 2016 - January 2017

- Evaluate systems functionality and assess user needs and operational impact
- Provide technical support to internal and external customers
- Consult with internal and external users to identify issues and clarify program and/or system intentions
- Responsible for troubleshooting errors and workflow concerns related specifically to existing and future system applications

**Data Integrity Analyst** Torchmark Corporation McKinney, Texas March 2013 - March 2016

- Reviewed and audited reports from mainframe and server processes to ensure data integrity
- Researched and identified missing application information on mainframe, and ensured correct data was inputted
- Monitored the processing status of jobs and contact management as needed if problems occur

## EDUCATION/PROFESSIONAL DEVELOPMENT:

Texas A&M University-Commerce Commerce, TX May 2011 BBA, Management Information Systems & Finance  
Coding Dojo Dallas, TX July 2016 Software Development/Web Developer coding bootcamp
